

## Contents

<b>List of Contributors</b>	<i>xiii</i>
<b>Preface</b>	<i>xv</i>
<b>1 Environmental Systems Analysis</b>	<b>1</b>
<i>Adisa Azapagic</i>	
1.1 Introduction	1
1.2 Environmental Systems Analysis Methods	1
1.3 Summary	11
References	11
<b>2 Measurements in Environmental Engineering</b>	<b>13</b>
<i>Daniel A. Vallero</i>	
Summary	13
2.1 Introduction	13
2.2 Environmental Sampling Approaches	18
2.3 Laboratory Analysis	22
2.4 Sources of Uncertainty	25
2.5 Measurements and Models	27
2.6 Contaminants of Concern	27
2.7 Environmental Indicators	31
2.8 Emerging Trends in Measurement	33
2.9 Measurement Ethics	40
Note	41
References	41
<b>3 Environmental Law for Engineers</b>	<b>45</b>
<i>Jana B. Milford</i>	
3.1 Introduction and General Principles	45
3.2 Common Law	48
3.3 The National Environmental Policy Act	50
3.4 Clean Air Act	52
3.5 Clean Water Act	55
3.6 Resource Conservation and Recovery Act	58
3.7 CERCLA	61
3.8 Enforcement and Liability	62
Notes	65
<b>4 Climate Modeling</b>	<b>67</b>
<i>Huei-Ping Huang</i>	
4.1 Introduction	67
4.2 Historical Development	67

- 4.3 Numerical Architecture of the Dynamical Core 68
- 4.4 Physical and Subgrid-Scale Parameterization 71
- 4.5 Coupling among the Major Components of the Climate System 73
- 4.6 The Practice of Climate Prediction and Projection 73
- 4.7 Statistical Model 77
- 4.8 Outlook 77
- References 78
  
- 5 Climate Change Impact Analysis for the Environmental Engineer 83**  
*Panshu Zhao, John R. Giardino, and Kevin R. Gamache*
- 5.1 Introduction 83
- 5.2 Earth System's Critical Zone 84
- 5.3 Perception, Risk, and Hazard 87
- 5.4 Climatology Methods 94
- 5.5 Geomorphometry: The Best Approach for Impact Analysis 99
- References 114
  
- 6 Adaptation Design to Sea Level Rise 119**  
*Mujde Erten-Unal and Mason Andrews*
- 6.1 Introduction: Sea Level Rise 119
- 6.2 Existing Structures and Adaptation Design to Sea Level Rise 120
- 6.3 Case Studies Reflecting Adaptation Design Solutions 124
- Notes 135
- References 135
  
- 7 Soil Physical Properties and Processes 137**  
*Morteza Sadeghi, Ebrahim Babaeian, Emmanuel Arthur, Scott B. Jones, and Markus Tuller*
- 7.1 Introduction 137
- 7.2 Basic Properties of Soils 137
- 7.3 Water Flow in Soils 158
- 7.4 Solute Transport 173
- 7.5 Soil Temperature, Thermal Properties, and Heat Flow 182
- 7.6 Summary 194
- Acknowledgments 194
- Abbreviations 194
- Physical Constants and Variables 195
- References 198
  
- 8 In Situ Soil and Sediment Remediation: Electrokinetic and Electrochemical Methods 209**  
*Sibel Pamukcu*
- 8.1 Introduction and Background 209
- 8.2 Overview and Theory of Direct Electric Current in Soil and Sediment Remediation 211
- 8.3 Electrokinetically and Electrochemically Aided Soil and Sediment Remediation 222
- 8.4 Summary and Conclusions 239
- References 240
  
- 9 Remote Sensing of Environmental Variables and Fluxes 249**  
*Morteza Sadeghi, Ebrahim Babaeian, Ardeshir M. Ebtehaj, Scott B. Jones, and Markus Tuller*
- 9.1 Introduction 249
- 9.2 Radiative Transfer Theory 249
- 9.3 RS Technology 255
- 9.4 RS of Static Soil Properties 263
- 9.5 RS of State Variables 269
- 9.6 RS of Environmental Fluxes 282

9.7	Summary	287
	Acknowledgments	288
	Abbreviations	288
	Physical Constants and Variables	289
	References	290
<b>10</b>	<b>Environmental Fluid Mechanics</b>	<b>303</b>
	<i>Nigel B. Kaye, Abdul A. Khan, and Firat Y. Testik</i>	
10.1	Open-Channel Flow	303
10.2	Surface Waves	308
10.3	Groundwater Flow	310
10.4	Advection and Diffusion	313
10.5	Turbulent Jets	318
10.6	Turbulent Buoyant Plumes	320
10.7	Gravity Currents	326
	References	329
<b>11</b>	<b>Water Quality</b>	<b>333</b>
	<i>Steven C. Chapra</i>	
11.1	Introduction	333
11.2	Historical Background	334
11.3	Overview of Modern Water Quality	336
11.4	Natural or “Conventional” Water Quality Problems	339
11.5	Toxic Substances	345
11.6	Emerging Water Pollutants	348
11.7	Back to the Future	348
	Note	349
	References	349
<b>12</b>	<b>Wastewater Engineering</b>	<b>351</b>
	<i>Say Kee Ong</i>	
12.1	Introduction	351
12.2	Wastewater Characteristics and Treatment Requirements	351
12.3	Treatment Technologies	355
12.4	Summary	371
	References	371
<b>13</b>	<b>Wastewater Recycling</b>	<b>375</b>
	<i>Judith L. Sims and Kirsten M. Sims</i>	
13.1	Introduction	375
13.2	Uses of Reclaimed Wastewater	376
13.3	Reliability Requirements for Wastewater Reclamation and Recycling Systems	414
13.4	Planning and Funding for Wastewater Reclamation and Reuse	416
13.5	Legal and Regulatory Issues	416
13.6	Public Involvement and Participation	418
13.7	Additional Considerations for Wastewater Recycling and Reclamation: Integrated Resource Recovery	418
13.8	Additional Sources of Information	423
	References	423
<b>14</b>	<b>Design of Porous Pavements for Improved Water Quality and Reduced Runoff</b>	<b>425</b>
	<i>Will Martin, Milani Sumanasooriya, Nigel B. Kaye, and Brad Putman</i>	
14.1	Introduction	425
14.2	Benefits	428

- 14.3 Hydraulic Characterization 430
- 14.4 Hydraulic and Hydrologic Behavior 435
- 14.5 Design, Construction, and Maintenance 442
  - References 448
  
- 15 Air Pollution Control Engineering 453**  
*Kumar Ganesan and Louis Theodore*
- 15.1 Overview of Air Quality 453
- 15.2 Emissions of Particulates 453
- 15.3 Control of Particulates 459
- 15.4 Control of Gaseous Compounds 476
  - Acknowledgment 491
  - References 491
  - Further Reading 491
  
- 16 Atmospheric Aerosols and Their Measurement 493**  
*Christian M. Carrico*
- 16.1 Overview of Particulate Matter in the Atmosphere 493
- 16.2 History and Regulation 493
- 16.3 Particle Concentration Measurements 494
- 16.4 Measuring Particle Sizing Characteristics 497
- 16.5 Ambient Aerosol Particle Size Distribution Measurements 498
- 16.6 Aerosol Measurements: Sampling Concerns 501
- 16.7 Aerosol Formation and Aging Processes 501
- 16.8 Aerosol Optical Properties: Impacts on Visibility and Climate 502
- 16.9 Measurements of Aerosol Optical Properties 505
- 16.10 Aerosol Chemical Composition 506
- 16.11 Aerosol Hygroscopicity 509
- 16.12 Aerosols, Meteorology, and Climate 511
- 16.13 Aerosol Emission Control Technology 513
- 16.14 Summary and Conclusion 515
  - References 515
  
- 17 Indoor Air Pollution 519**  
*Shelly L. Miller*
- 17.1 Introduction 519
- 17.2 Completely Mixed Flow Reactor Model 522
- 17.3 Deposition Velocity 524
- 17.4 Ultraviolet Germicidal Irradiation 526
- 17.5 Filtration of Particles and Gases 528
- 17.6 Ventilation and Infiltration 532
- 17.7 Ventilation Measurements 536
- 17.8 Thermal Comfort and Psychrometrics 539
- 17.9 Energy Efficiency Retrofits 541
- 17.10 Health Effects of Indoor Air Pollution 542
- 17.11 Radon Overview 546
- 17.12 Sources of Indoor Radon 548
- 17.13 Controlling Indoor Radon 550
- 17.14 Particles in Indoor Air 551
- 17.15 Bioaerosols 553
- 17.16 Volatile Organic Compounds 555
- 17.17 VOC Surface Interactions 556
- 17.18 Emissions Characterization 557

17.19	Odors	559
	Acknowledgments	560
	Note	560
	References	560
<b>18</b>	<b>Environmental Noise Pollution</b>	<b>565</b>
	<i>Sharad Gokhale</i>	
18.1	Introduction	565
18.2	Environmental Noise	565
18.3	Effects on Human Health and Environment	566
18.4	Sound Propagation in Environment	567
18.5	Characteristics of Sound	569
18.6	Relationship Between Characteristics	570
18.7	Environmental Noise Levels	573
18.8	Measurement and Analysis of Ambient Noise	574
18.9	Environmental Noise Management	579
	Note	580
	References	581
<b>19</b>	<b>Hazardous Waste Management</b>	<b>583</b>
	<i>Clayton J. Clark II and Stephanie Luster-Teasley</i>	
19.1	Fundamentals	583
19.2	Legal Framework	585
19.3	Fate and Transport	591
19.4	Toxicology	593
19.5	Environmental Audits	594
19.6	General Overall Site Remediation Procedure	596
	References	598
<b>20</b>	<b>Waste Minimization and Reuse Technologies</b>	<b>599</b>
	<i>Bora Cetin and Lin Li</i>	
20.1	Introduction	599
20.2	Type of Recycled Waste Materials	599
20.3	Recycling Applications of Fly Ash and Recycled Concrete Aggregates	601
20.4	Benefit of Recycling Materials Usage	621
20.5	Conclusions	621
	References	623
<b>21</b>	<b>Solid Waste Separation and Processing: Principles and Equipment</b>	<b>627</b>
	<i>Georgios N. Anastassakis</i>	
21.1	Introduction	627
21.2	Size (or Volume) Reduction of Solid Waste	629
21.3	Size Separation	636
21.4	Manual-/Sensor-Based Sorting	638
21.5	Density (or Gravity) Separation	649
21.6	Magnetic/Electrostatic Separation	653
21.7	Ballistic Separation	660
21.8	Froth Flotation	661
21.9	Products Agglomeration (Cubing and Pelletizing)	661
21.10	Compaction (Baling)	663
21.11	Benefits and Prospects of Recycling	666
	References	669

**22 Waste Reduction in Metals Manufacturing 673**

*Carl C. Nesbitt*

22.1 Wastes at the Mine Sites 674

22.2 Chemical Metallurgy Wastes 678

22.3 Conclusions 686

Reference 686

Further Reading 687

**23 Waste Reduction and Pollution Prevention for the Chemicals Industry: Methodologies, Economics, and Multiscale Modeling Approaches 689**

*Cheng Seong Khor, Chandra Mouli R. Madhuranthakam, and Ali Elkamel*

23.1 Introduction 689

23.2 Development of Pollution Prevention Programs 691

23.3 Economics of Pollution Prevention 698

23.4 Survey of Tools, Technologies, and Best Practices for Pollution Prevention 699

23.5 Concluding Remarks 707

References 707

**24 Industrial Waste Auditing 709**

*C. Visvanathan*

24.1 Overview 709

24.2 Waste Minimization Programs 710

24.3 Waste Minimization Cycle 711

24.4 Waste Auditing 712

24.5 Phase I: Preparatory Works for Waste Audit 712

24.6 Phase II: Preassessment of Target Processes 717

24.7 Phase III: Assessment 719

24.8 Phase IV: Synthesis and Preliminary Analysis 722

24.9 Conclusion 724

Suggested Reading 729
