<b>1</b>	<b>Probability</b>	<b>1</b>
1.1	Sample Spaces, Events, and $\sigma$ -Algebras	1
	Problems	7
1.2	Probability Axioms and Rules	9
	Problems	14
1.3	Probability with Equally Likely Outcomes	16
	Problems	18
1.4	Conditional Probability	19
	Problems	25
1.5	Independence	28
	Problems	31
1.6	Counting Methods	33
	Problems	38
1.7	Case Study – The Birthday Problem	41
	Problems	44
<b>2</b>	<b>Random Variables and Random Vectors</b>	<b>45</b>
2.1	Random Variables	45
2.1.1	Properties of Random Variables	46
	Problems	50
2.2	Random Vectors	53
2.2.1	Properties of Random Vectors	53
	Problems	60
2.3	Independent Random Variables	63
	Problems	66
2.4	Transformations of Random Variables	68
2.4.1	Transformations of Discrete Random Variables	68

2.4.2	Transformations of Continuous Random Variables	69
2.4.3	Transformations of Continuous Bivariate Random Vectors	73
	Problems	75
2.5	Expected Values for Random Variables	77
2.5.1	Expected Values and Moments of Random Variables	77
2.5.2	The Variance of a Random Variable	81
2.5.3	Moment Generating Functions	86
	Problems	89
2.6	Expected Values for Random Vectors	94
2.6.1	Properties of Expectation with Random Vectors	96
2.6.2	Covariance and Correlation	99
2.6.3	Conditional Expectation and Variance	106
	Problems	110
2.7	Sums of Random Variables	114
	Problems	120
2.8	Case Study – How Many Times was the Coin Tossed?	123
2.8.1	The Probability Model	124
	Problems	126
<b>3</b>	<b>Probability Models</b>	<b>129</b>
3.1	Discrete Probability Models	129
3.1.1	The Binomial Model	129
3.1.1.1	Binomial Setting	130
3.1.2	The Hypergeometric Model	132
3.1.2.1	Hypergeometric Setting	132
3.1.3	The Poisson Model	134
3.1.4	The Negative Binomial Model	135
3.1.4.1	Negative Binomial Setting	135
3.1.5	The Multinomial Model	138
3.1.5.1	Multinomial Setting	139
	Problems	140
3.2	Continuous Probability Models	147
3.2.1	The Uniform Model	147
3.2.2	The Gamma Model	149
3.2.3	The Normal Model	152
3.2.4	The Log-normal Model	155
3.2.5	The Beta Model	156
	Problems	158
3.3	Important Distributional Relationships	163
3.3.1	Sums of Random Variables	163
3.3.2	The $T$ and $F$ Distributions	166
	Problems	170
3.4	Case Study – The Central Limit Theorem	172

3.4.1	Convergence in Distribution	172
3.4.2	The Central Limit Theorem	173
	Problems	176
<b>4</b>	<b>Parametric Point Estimation</b>	<b>177</b>
4.1	Statistics	177
4.1.1	Sampling Distributions	178
4.1.2	Unbiased Statistics and Estimators	179
4.1.3	Standard Error and Mean Squared Error	181
4.1.4	The Delta Method	186
	Problems	186
4.2	Sufficient Statistics	190
4.2.1	Exponential Family Distributions	195
	Problems	200
4.3	Minimum Variance Unbiased Estimators	203
4.3.1	Cramér–Rao Lower Bound	205
	Problems	212
4.4	Case Study – The Order Statistics	214
	Problems	219
<b>5</b>	<b>Likelihood-based Estimation</b>	<b>223</b>
5.1	Maximum Likelihood Estimation	226
5.1.1	Properties of MLEs	226
5.1.2	One-parameter Probability Models	228
5.1.3	Multiparameter Probability Models	235
	Problems	240
5.2	Bayesian Estimation	247
5.2.1	The Bayesian Setting	247
5.2.2	Bayesian Estimators	250
	Problems	255
5.3	Interval Estimation	258
5.3.1	Exact Confidence Intervals	259
5.3.2	Large Sample Confidence Intervals	264
5.3.3	Bayesian Credible Intervals	267
	Problems	269
5.4	Case Study – Modeling Obsidian Rind Thicknesses	273
5.4.1	Finite Mixture Model	274
	Problems	278
<b>6</b>	<b>Hypothesis Testing</b>	<b>281</b>
6.1	Components of a Hypothesis Test	282
	Problems	286
6.2	Most Powerful Tests	288

	Problems	293
6.3	Uniformly Most Powerful Tests	296
6.3.1	Uniformly Most Powerful Unbiased Tests	299
	Problems	301
6.4	Generalized Likelihood Ratio Tests	305
	Problems	311
6.5	Large Sample Tests	314
6.5.1	Large Sample Tests Based on the MLE	314
6.5.2	Score Tests	316
	Problems	320
6.6	Case Study – Modeling Survival of the Titanic Passengers	323
6.6.1	Exploring the Data	324
6.6.2	Modeling the Probability of Survival	325
6.6.3	Analysis of the Fitted Survival Model	327
	Problems	328
<b>7</b>	<b>Generalized Linear Models</b>	<b>331</b>
7.1	Generalized Linear Models	332
	Problems	334
7.2	Fitting a Generalized Linear Model	336
7.2.1	Estimating $\hat{\beta}$	336
7.2.2	Model Deviance	338
	Problems	340
7.3	Hypothesis Testing in a Generalized Linear Model	341
7.3.1	Asymptotic Properties	341
7.3.2	Wald Tests and Confidence Intervals	342
7.3.3	Likelihood Ratio Tests	343
	Problems	346
7.4	Generalized Linear Models for a Normal Response Variable	348
7.4.1	Estimation	349
7.4.2	Properties of the MLEs	353
7.4.3	Deviance	357
7.4.4	Hypothesis Testing	359
	Problems	362
7.5	Generalized Linear Models for a Binomial Response Variable	365
7.5.1	Estimation	366
7.5.2	Properties of the MLEs	368
7.5.3	Deviance	370
7.5.4	Hypothesis Testing	371
	Problems	373

7.6	Case Study – IDNAP Experiment with Poisson Count Data	375
7.6.1	The Model	376
7.6.2	Statistical Methods	376
7.6.3	Results of the First Experiment	379
	Problems	381
