	List of Figures	<i>xi</i>
	Preface	<i>xiii</i>
	List of Notation	<i>xv</i>
	Acronyms	<i>xvii</i>
1	Introduction	<i>1</i>
1.1	Empirical Examples	<i>1</i>
1.2	Overview	<i>6</i>
2	Stationary Processes	<i>11</i>
2.1	Stochastic Processes	<i>11</i>
2.2	Ergodicity	<i>14</i>
2.3	Memory and Persistence	<i>22</i>
2.4	Technical Appendix: Proofs	<i>25</i>
3	Moving Averages and Linear Processes	<i>27</i>
3.1	Infinite Series and Summability	<i>27</i>
3.2	Wold Decomposition and Invertibility	<i>32</i>
3.3	Persistence versus Memory	<i>37</i>
3.4	Autoregressive Moving Average Processes	<i>47</i>
3.5	Technical Appendix: Proofs	<i>51</i>
4	Frequency Domain Analysis	<i>57</i>
4.1	Decomposition into Cycles	<i>57</i>
4.2	Complex Numbers and Transfer Functions	<i>62</i>
4.3	The Spectrum	<i>63</i>
4.4	Parametric Spectra	<i>68</i>
4.5	(Asymptotic) Properties of the Periodogram	<i>72</i>
4.6	Whittle Estimation	<i>76</i>
4.7	Technical Appendix: Proofs	<i>81</i>

5	Differencing and Integration	89
5.1	Integer Case	89
5.2	Approximating Sequences and Functions	91
5.3	Fractional Case	95
5.4	Technical Appendix: Proofs	99
6	Fractionally Integrated Processes	103
6.1	Definition and Properties	103
6.2	Examples and Discussion	108
6.3	Nonstationarity and Type I Versus II	114
6.4	Practical Issues	118
6.5	Frequency Domain Assumptions	120
6.6	Technical Appendix: Proofs	123
7	Sample Mean	127
7.1	Central Limit Theorem for $I(0)$ Processes	127
7.2	Central Limit Theorem for $I(d)$ Processes	129
7.3	Functional Central Limit Theory	132
7.4	Inference About the Mean	139
7.5	Sample Autocorrelation	141
7.6	Technical Appendix: Proofs	145
8	Parametric Estimators	149
8.1	Parametric Assumptions	149
8.2	Exact Maximum Likelihood Estimation	150
8.3	Conditional Sum of Squares	154
8.4	Parametric Whittle Estimation	156
8.5	Log-periodogram Regression of FEXP Processes	161
8.6	Fractionally Integrated Noise	164
8.7	Technical Appendix: Proofs	165
9	Semiparametric Estimators	169
9.1	Local Log-periodogram Regression	169
9.2	Local Whittle Estimation	175
9.3	Finite Sample Approximation	182
9.4	Bias Approximation and Reduction	184
9.5	Bandwidth Selection	188
9.6	Global Estimators	193
9.7	Technical Appendix: Proofs	195
10	Testing	197
10.1	Hypotheses on Fractional Integration	197
10.2	Rescaled Range or Variance	199

10.3	The Score Test Principle	204
10.4	Lagrange Multiplier (LM) Test	205
10.5	LM Test in the Frequency Domain	210
10.6	Regression-based LM Test	213
10.7	Technical Appendix: Proofs	218
11	Further Topics	223
11.1	Model Selection and Specification Testing	223
11.2	Spurious Long Memory	226
11.3	Forecasting	229
11.4	Cyclical and Seasonal Models	231
11.5	Long Memory in Volatility	234
11.6	Fractional Cointegration	236
11.7	R Packages	240
11.8	Neglected Topics	241
	Bibliography	245
	Index	267
