

# INDEX

acceptance criteria .....	110	passive hardware .....	34
hardware barriers .....	110	barrier types .....	
HOF barriers .....	110	examples .....	36
accident trajectory .....	5	barrier validity .....	63
active barriers .....		barrier visualization .....	10
detect-decide-act .....	32, 34	barriers .....	11, 32
advantage of a human barrier.....	72	addition and removal .....	105
ALARP demonstration .....	57	adequacy .....	100
ALARP demonstrations .....	134	concept .....	32
ARAMIS.....	6	counting .....	101
assumptions .....	59	criticality .....	101
assurance.....	124	display of condition .....	105
audience .....	2	effective, independent, auditable .....	32
audiences with different		effectiveness / strength .....	98
communication .....	94	linkage to PSM .....	117
audits.....	124	management strategy .....	115
barrier .....		mitigation .....	33
auditable.....	39	prevention .....	33
common mode failures.....	38	properties .....	32
effective .....	37	reliability / availability .....	99
independent.....	37	sequence .....	40
barrier condition.....	104	bow tie .....	
barrier criticality .....	63	function .....	11
barrier effectiveness.....	63	identify consequences .....	61
barrier elements .....	41	identify hazard and top event .....	61
barrier examples .....		identify prevention barriers .....	62
poorly worded .....	43	identify threats .....	62
well worded .....	43	linkage to RBPS .....	92
barrier function .....	41	bow tie case study .....	
barrier management .....	41	pipeline example .....	153
flowchart .....	119	bow tie chaining .....	144
management of change .....	125	bow tie creation flow chart .....	62
organizational change .....	126	bow tie development .....	53
barrier name .....	62	bow tie workshop .....	53, 60
barrier owners .....		completion activities .....	64
accountability .....	11	documents needed .....	58
barrier properties .....	37	pre-work .....	56
barrier system .....	41	questions to consider .....	54
barrier type .....	63	terms of reference .....	56
active hardware .....	34	bow tie workshop duration .....	64
active hardware + human .....	34	bow ties .....	
active human .....	34	additional uses .....	131
continuous hardware .....	34
