Preface xv

A.1

Section A Initial State of Adhesive Joints

Adhesion and Interphases: The Basic Ideas in Brief 3

	Wulff Possart			
A.1.1	Introductory Remarks and General Concepts 3			
A.1.2	Fundamental Adhesive Interactions – the Microscopic Origin			
	and Further Concepts 4			
A.1.2.1	Physical Intermolecular Forces 4			
A.1.2.1.1				
A.1.2.1.2	Physical Interactions Between Condensed Phases 9			
A.1.2.2	Chemical Adhesion Mechanisms 11			
A.1.2.2.1	A Brief Sketch of MO Theory 12			
A.1.2.2.2				
	Structure 13			
A.1.2.2.3	Chemical Reactions – General Aspects 14			
A.1.2.2.4	Chemical Adhesion Mechanisms in Reactive Epoxies on Inorganic			
	Solids 16			
A.1.2.2.5	.2.5 Chemical Adhesion Mechanisms in Reactive Polyurethanes on			
	Inorganic Solids 18			
A.1.2.3	The Electrostatic Component of Adhesion 21			
A.1.2.3.1	Mobile Charge Carriers and the Electric Double Layer 22			
A.1.2.3.2	· · · · · · · · · · · · · · · · · · ·			
	Electrons 23			
A.1.2.4	Microscopic Adhesion Mechanisms – Co-action at the Phase			
	Boundary 26			
A.1.2.5	Mechanical Interlocking 27			
A.1.3	The Interphase – Elemental State of the Adhesive–Adherend Phase			
	Boundary 28			
A.1.3.1	Polymer Adhesives on Impenetrable Solids 28			
A.1.3.2	Polymerisation on Solids 32			
A.1.3.3	The Contact Between Viscoelastic Polymers 34			
A.1.4	Closing Remarks: Fundamental vs. Practical Adhesion 35			
	References 36			
	Further Readings 41			

A.2	dhesive Network Formation: Continuum Mechanical			
Modelling and Simulation 43				
	Gunnar Possart and Paul Steinmann			
A.2.1	Introduction 43			
A.2.2	Phenomenological Observations in Polymer Curing 44			
A.2.3				
A.2.4	č			
A.2.5	Three-dimensional Linear Viscoelastic Curing at Small Strains 52 Three-dimensional Curing at Large Strains 55			
A.2.5.1	Elastic Simulation Framework and Thermodynamic			
	Consistency 55			
A.2.5.2	Elastic Neo-Hookean Curing Model 58			
A.2.5.3	Viscoelastic Simulation Framework 59			
A.2.5.4	Viscoelastic Neo-Hookean Curing Model 59			
A.2.5.5	The Consideration of Curing Shrinkage 64			
A.2.6	Material Parameter Evolutions During Curing 65			
A.2.6.1	Shear Modulus/Second Lamé Parameter μ 66			
A.2.6.2	Poisson's Ratio v 67			
A.2.6.3	Bulk Modulus κ and First Lamé Parameter λ 67			
A.2.6.4	Relaxation Time T 68			
A.2.6.5	Curing Shrinkage s 68			
A.2.6.6	Degree of Cure 68			
A.2.7	Epoxy–Ceramics Composite: Photoelasticity and Curing			
Π.Δ./	Shrinkage 69			
	Bibliography 73			
	Dibliography 73			
A.3	Mechanical Interphases in Adhesive Joints:			
71.5	Characterisation Methods and FE-Simulations 79			
	Gunnar Possart and Paul Steinmann			
A.3.1	Introduction 79			
A.3.2	High-Resolution Shear Testing by Scanning Electron			
A.J.2	Microscopy 84			
A.3.2.1	Specimen Preparation and Experimental Set-up 84			
A.3.2.1 A.3.2.2	Results and Discussion 88			
A.3.2.3	FE-Simulations of Adhesive Layers with Interphases 91			
A.3.2.3.1	Simulation Set-up and Mesh Dependency Study 92			
A.3.2.3.2 A.3.2.3.3	Elastic Interphases 97			
A.3.2.4	Elastoplastic Interphases 101 Can Curing Shrinkage Fake Interphases? 106			
	Can Curing Shrinkage Fake Interphases? 106			
A.3.3				
1 2 2 1	Nanoindentations Across Adhesive Joints 110			
A.3.3.1	Nanoindentations Across Adhesive Joints 110 Introduction and Experimental Data 110			
A.3.3.1 A.3.3.2	Nanoindentations Across Adhesive Joints 110 Introduction and Experimental Data 110 Determination of Stiffness and Hardness According to			
A.3.3.2	Nanoindentations Across Adhesive Joints 110 Introduction and Experimental Data 110 Determination of Stiffness and Hardness According to Oliver&Pharr 113			
A.3.3.2 A.3.3.3	Nanoindentations Across Adhesive Joints 110 Introduction and Experimental Data 110 Determination of Stiffness and Hardness According to Oliver&Pharr 113 FE-Simulations of Nanoindentations Across Adhesive Joints 114			
A.3.3.2 A.3.3.3 A.3.3.3.1	Nanoindentations Across Adhesive Joints 110 Introduction and Experimental Data 110 Determination of Stiffness and Hardness According to Oliver&Pharr 113 FE-Simulations of Nanoindentations Across Adhesive Joints 114 Simulation Set-up 114			
A.3.3.2 A.3.3.3 A.3.3.3.1 A.3.3.3.2	Nanoindentations Across Adhesive Joints 110 Introduction and Experimental Data 110 Determination of Stiffness and Hardness According to Oliver&Pharr 113 FE-Simulations of Nanoindentations Across Adhesive Joints 114 Simulation Set-up 114 Results and Discussion 117			
A.3.3.2 A.3.3.3 A.3.3.3.1	Nanoindentations Across Adhesive Joints 110 Introduction and Experimental Data 110 Determination of Stiffness and Hardness According to Oliver&Pharr 113 FE-Simulations of Nanoindentations Across Adhesive Joints 114 Simulation Set-up 114			

A.3.4.2 A.3.5	Results and Discussion 123 Conclusions and Outlook 126 Acknowledgements 128 Bibliography 128				
A.4.1 A.4.2 A.4.3 A.4.4 A.4.5 A.4.6	Fracture Mechanics of Adhesive Joints 135 Markus Brede Introduction 135 Linear-elastic Fracture Mechanics 137 Fracture in Materials with Energy Dissipation 143 The Cohesive Zone Model and Fracture of Joints with Toughened Adhesives 145 The Micro-structure of Toughened Adhesives 156 Conclusions 161 Acknowledgements 162 References 162
