

Index

a

- 4-acetyloxyindoles 110, 112
 3-acetyl-2-alkynylpyridines 127, 128
 acetylenic aldehydes with indoles 94
 acetylenic imido complex 363
 A³ coupling 10–11, 332–335, 645,
 663–665, 711, 713, 761–765, 767
 acrolein formation 728
 acrylamides 236, 245, 248, 251, 253,
 309, 776
 acryl sulfonamides 347
 active methylene 127, 129, 225, 289,
 363–365
 acylarylation 234, 352, 353
 acylated heteroarene *N*-oxides 342
 2-acylated pyridine-*N*-oxides 192
 3-acylcoumarins 235, 353, 354
 acylfluorination of styrenes 226, 227,
 291
 6-acyl phenanthridines 353
 aerobic alcohol oxidation 735–737
 Ag(I)/Ag(II)-metal-organic frameworks
 58
 Ag-BINAP 37, 70
 Ag-catalysed and P-centered
 radical-mediated tandem
 reactions 347
 Ag catalysis 340, 382, 622, 658, 728
 Ag-catalyzed asymmetric
 oxa-Diels-Alder reaction 68
 Ag-catalyzed azide-alkyne
 cycloadditions 54
 Ag-catalyzed Conia-Ene reaction 87
 Ag-catalyzed coupling reactions/C–H
 functionalization 331
 Ag-catalyzed C1-phosphonylation 398
 Ag-catalyzed cross-dimerization 53
 Ag-catalyzed decarboxylative
 fluorination 372
 Ag-catalyzed 7-*endo*-dig Conia-ene
 reaction 89
 Ag-catalyzed isocyanide-based
 three-component coupling
 reaction 73
 Ag-catalyzed oxa-Diels-Alder Reaction
 67
 Ag-cinchona alkaloid derivatives 42
 Ag-complexed *trans*-cycloheptene 63
 Ag-DTBM-Segphos 37
 Ag-Feringa phosphoramidite 39
 Ag-ferrocenyl *N,P*-ligands 40
 Ag-ferrocenyloxazoline 40
 AgF-mediated coupling of styrenes
 202
 AgF-mediated di- and
 trifluoromethylation of styrenes
 224
 Ag-hydrocinchonine 42
 Ag-hydrotris(pyrazolyl)borate 76
 Ag-iminophosphine-catalyzed
 aza-Diels-Alder reactions 71
 Ag-NHC-catalyzed azide-alkyne
 cycloaddition 55
 AgNO₃-catalyzed carbon
 phosphorylation of
 acrylamide 346

- Ag NP-catalyzed dehydrogenative
Diels-Alder reaction 66
- Ag NP-promoted photocatalytic
Diels-Alder reaction 67
- Ag-PHOX 39
- Ag-promoted azide-alkyne
cycloaddition 56
- Ag-promoted double cyclization of
 α -iminoarylesters 50
- Ag-promoted sequential 1,3-acyloxy
migration 64
- Ag-QUINAP 37
- AgSbF₆-catalyzed C4-sulfonylation
202
- Ag-sulfinylimine 42
- Ag-Taniaphos 41
- Ag-TF-BiphamPhos 38
- Ag-ThioClickFerrophos 41
- Ag₂WO₄/Ph₃P or Ag₂CO₃/PPh₃ system
418
- Ag-Xing-Phos 46
- Ag-XPhos complexes 71
- akuammiline alkaloids 682
- alcohol-alcohol coupling 748–750
- alcohol-amine coupling 742–748
- alcohol dehydrogenation 734,
737–739, 743
- alcohol oxidation
aerobic alcohol oxidation 735–737
alcohol-amine coupling 742–748
alcohol dehydrogenation 737–739
benzylic and aliphatic alcohols 733
 β -hydride elimination 733
enthalpy of reaction 734
mechanism 733
pathways and side reactions 735
Sanderson's classification of transition
metal oxides 734
silver alloys 739–742
- aldehyde-alkyne-amine reaction 10,
332
- aldehyde, catalytic oxidation and
reduction
alcohol, aldehyde and derivatives
652–657
catalytic hydrogenation 649–651
catalytic hydrosilylation 647
nucleophilic aldehyde addition 645
tradition-metal-catalyzed
hydrogenation and transfer
hydrogenation 647
transfer hydrogenation 651–652
- aldehydes 43, 47, 53, 67, 68, 77, 94,
113, 126, 149, 188, 194, 210, 216,
238, 283, 334, 339, 398, 505, 508,
534, 535, 540, 541, 557, 574,
579–581, 587, 602–606, 616, 617,
623, 626, 630, 633, 645–648,
650–655, 711, 753, 758, 770–772,
781
- Aldol reactions
aldehydes and alkenyl trihaloacetates
604
aldehydes and α -sulfonyl lactones
606
alkenyl trichloroacetates 601
chiral β -hydroxy carbonyl compounds
601
domino and tandem reactions
579–583
 α -ketoesters 603
lower diastereo- and
enantioselectivities 603
nitroso-aldol reactions 606
silyl enolates 605
- aliphatic carboxylic acids 19, 20, 22,
23, 188, 197, 200, 204, 215, 216,
218, 226, 228, 235, 258, 289, 294,
322, 340–342, 352, 372, 373, 376,
377, 386, 387, 395, 396, 709, 710
- aliphatic C–H chlorination 217
- aliphatic C–H trifluoromethylthiolation
203, 322
- aliphatics 739
- alkanolamines 410
- alkene epoxidation 727
ethylene oxide (EO) 724–726
propylene oxide (PO) 727–729
styrene epoxidation 729–733
- alkenes 122
hydroalkoxylation 154
hydrocarboxylation 158

- alkenoic acids 154, 158, 159
- 2-alkenylanilines 387
- alkenyl metal intermediate 417
- alkoxyallene-based dihydrofurans 150
- alkoxymethylidene cyclopropane 59, 60
- 2-alkoxyppyridine 113
- 1,2-alkylarylation of styrenes 227, 228
- 3-alkyl-4-aryldihydroquinolin-2(1*H*)-ones 235
- 2-alkyl benzaldehyde 64
- alkylboronates 220, 221
- alkyl C–H bonds 214, 380
- alkylethynyl-benzofuran-3-carbaldehydes 126
- alkylethynyl-benzothiophene-2-carbaldehydes 126
- alkyl Grignard reagents, homo-coupling of 14
- alkyl halides 7, 15, 201
- alkylidene cyclic carbonate 408, 417, 418, 666, 667
- alkylidene- γ -butyrolactams 102
- alkylidene malonates 37, 39, 595
- 3-alkylideneoxindoles 366, 450, 454
- alkyl isocyanides 365
- alkyne cross-coupling 767–768
- 3-alkyne-1,2-diols 145
- alkyne-functionalized azomethines 144
- alkynes
- 5- and 6-*endo*-dig cyclizations 107–115
 - 5- and 6-*exo*-dig cyclizations 102–107
 - aromatic *N*-heterocyclic compounds 141–143
 - hydrazones 134–141
 - hydroalkoxylation 144–155
 - hydrocarboxylation 155–159
 - imines as nucleophiles 123–129
 - larger ring cyclizations 116
 - oximes 129–134
 - as partners 159–168
 - reduction 754–755
- alkyne-tethered benzimidazoles 113, 115
- alkyne-tethered benzoxazoles 141
- alkyne-tethered β -ketoesters 89
- alkyne-tethered indoles 97, 98, 682, 683
- alkyne-tethered nitroolefins 89
- alkyne-tethered pyridines 141
- alkynoates 122, 156, 245, 253, 319, 320, 351, 352, 354
- alkynophilicity/carbophilic nature of silver 4–6
- 2-alkynylacetophenones 127, 128
- 3-alkynylacrylaldehydes 164, 586, 587, 680, 681
- 2-alkynylaniline derivatives 111, 112
- 2-alkynylaryl aldehydes 123, 126, 162
- 2-alkynylaryl aldimines 123, 124
- 3-(2-alkynyl)aryl- β -ketoesters 87
- 2-alkynylaryl glycine imines 124, 125
- alkynylations 675
- Ag/Pd-catalyzed ring-opening reaction 616
- alkyne coupling to carbon dioxide 765–766
- alkyne cross-coupling 767–768
- allenyl boronic acid pinacol ester 613–615
- chiral propargylamines 610
- A³ coupling 761–765
- 1,3-diynes 612
- N*-aryl aromatic aldimines 611
- N*-sulfonylketimines 613
- vinyllic and aliphatic aldimines 612
- alkynylaziridines 96, 97
- 2-alkynylbenzaldehyde 126, 127, 139, 140, 161, 588, 679, 711
- 2-alkynylbenzaldoxime 62, 129, 130, 132, 133, 259
- 2-alkynyl benzenesulfonamides 113, 115
- 2-alkynylbenzoic acids 155, 156
- 2-alkynylbenzyl azides 143, 144
- alkynyl β -ketoesters 88
- 1-alkynylcyclobutanols 259
- 2-alkynyl cyclohexadienimines 62
- alkynyl imidates 115
- 2-alkynylindoles 104, 106

- 2-alkynyl-3-(silyl enol ether)quinoline derivatives 93
- allenamide 105
- 2,3-allenamides 363
- allenes 22, 522, 619
- 5-and 6-endo-trig cyclizations 118–122
 - exo*-trig cyclizations 116–118
 - hydroalkoxylation 149
 - hydrocarboxylation 157
 - as partners 168–169
- allenic hydroxylamines 118
- allenylamine 427–428
- allenyl carbamates 117
- allenylcarbinols 149
- 1-allenyl isochromenes 160
- allenyne-1,6-diols 145, 146
- 1,6-allenyne 95
- 1-(2-allylamino)phenyl-4-hydroxy-but-2-yn-1-ones 105
- allylation 4, 7, 198, 199, 201, 340, 341, 435, 533, 534, 593, 594, 616–622
- allylic silanes 504, 505, 513, 518, 520, 522, 524
- allylic sulfides 504, 522–525
- α -(acyloxy)acetates 691
- α,α -difluoroaryloxyacetic acids 220, 222
- α -allenic alcohols 149–151, 621, 677, 678
- α -allenols 149, 620, 633
- α -aminophosphonates 37, 398
- α -aryldiazoketones 169, 170
- α -aryl 2-isocyanoacetate 49
- $\alpha,\beta,\gamma,\delta$ -unsaturated carbonyl compounds 513
- α,β -unsaturated carbonyl compound 422
- α,β -unsaturated enones 60
- α,β -unsaturated ketones 49, 64
- α -CF₃ ketones 225
- α -CF₃-substituted ketones 223
- α -diazacetamides 687
- α -diazomethylphosphonates 675
- α -fluoroketones 283, 284, 296
- α -H abstraction 727
- α -iminoallene 121
- α -iminoarylesters 50
- α -iminonitriles 41
- α -indolylacrylates 370, 371
- α -keto acids 192, 197, 200, 235, 236, 240, 344
- α -oxocarboxylates 237, 353, 354
- α -oxocarboxylic acid 192–194, 197, 226, 234, 291, 342, 343, 352, 353
- α -sulfinylated acrylate 44
- α -thio, β -keto and α -fuoro acids 219
- α -trifluoromethylated isocyanides 53
- aluminum oxides 730
- amidoallenes 121
- amination reaction 102, 105, 108, 117, 623, 624, 747
- amino acid-derived iminophosphine ligands 70
- 2-aminobenzo-tethered alkynes 105
- 2-aminoethanol 411
- aminofluorination 228
- of allenes 230
- 2-amino-*H*-pyrazolo[5,1- α]isoquinolines 135
- 2-amino-6-propargylamine azines 142
- 2-aminopyridines 122, 283
- aminosulfonylation of alkynes 231
- α -naphthols 240
- α -naphthylamines 167
- 1,4-and 1,5-cyano group migration 255
- anilines 196, 197, 238, 310, 311, 458, 632, 744, 746, 776, 781
- anionic intermediate 417
- arenes 185, 186, 191, 192, 194, 207, 208, 210, 211, 220, 221, 227, 254, 257, 273, 298, 299, 303–305, 307, 310, 311, 313, 320, 337, 338, 342, 371, 374, 375, 388, 549, 707, 775
- aromatic acids 185, 195, 198, 206, 216, 218
- aromatic carboxylic acids 10
- aromatic C–H bonds 382
- aromatic compounds 375, 387
- aromatic *N*-heterocyclic compounds 141

- aromatic triazenes 191, 192, 196, 306, 307, 367, 368
- 6-arylated phenanthridines 353
- arylacrylamides 346
- aryl- and heteroarylsilanes 305
- arylation and alkylation reactions 370–371
- aryl benzoates 255
- arylboronic acid 191, 195, 196, 343, 357, 359, 392, 413
- arylboronic esters 413
- 2-aryl carboxylic acids 355
- aryldiazonium salts 196, 226, 288, 310–312, 673
- aryl-group substituted terminal alkyne 411
- arylidene imines 34, 36, 44
- aryl iodides 301, 302, 304, 712
- aryl isocyanides 53, 364
- arylisonitriles 347, 348
- aryl ketones 95, 342, 581, 585
- aryl migration 249–255, 260, 285, 319, 701, 702
- 1,4-aryl migration 251–254, 319
- arylnaphthalene lactones 411–413
- aryl-*N*-oxides 343
- arylphosphine oxides 350, 351
- arylpropiolic acids 212, 232, 248, 302, 303, 357, 391
- aryl stannanes 279, 280, 392
- aryltrifluoromethylthiolation 242, 317
- arylvinyl sulfides 393, 394
- Aspulinone E 432, 434, 435
- α -sulfinylated acrylate 44
- asymmetric counterion-directed catalysis (ACDC) approach 674
- Aurones 145, 760
- aza-Diels-Alder reaction 67–72, 592
- 3-aza-1,5-enynes 118, 119
- 8-azaergoline 192, 193
- azalactones 46
- azetidine 59, 60, 77, 78

 formation of C–N/P bonds 244–249
 formation of C–O/S/Se bonds 241–244
 catalytic asymmetric synthesis of cyclic carbonate 420
 C–B bond formation 397
 C–Br bond formation 377
 C3-C3' bis-indolin-2-ones 359
 C–C bond activation 296–297
 C–C bond formation-sequential cyclization 431
 C–C coupling 187, 197, 301, 742, 748, 749
 C–Cl bond formation 374–377
 (-)-cephalotaxine 108, 110, 592, 684
 cetyl alcohol 732
 C–F bond formation 8, 371–377
 chalcones 64–66, 200, 343, 344, 555
 C–Halogen bonds
 C–Br bond formation 377
 C–Cl bond formation 374–377
 C–F bond formation 371–374
 C–H bond activation 297–298
 C–H bond amidation
 intermolecular C–H bond amidations 494–498

- C–H bond amidation (*contd.*)
 intramolecular C–H bond amidations
 484–494
 mechanistic aspects 498–501
- C–H carboxylation 369, 370
- chemoselective cyclopropanation
 13–14
- C–H functionalization/C–O cyclization
 reactions 355
- C–H functionalization of quinones
 359
- C–H functionalization via carbene
 transfer 445, 447–450
- C–H insertion
 alkene or aromatic C(sp²)–H bonds
 450
 C–H functionalization via carbene
 transfer 450–452
 C–H functionalization via transition
 metal-catalyzed transfer
 443–447
 of ester 458–461
 N–H bonds 452–458
 O–H bonds 458, 463
 Si–H functionalization 461
- chiral ligand (*S*)-TF-BiphamPhos 61
- chiral *N*-Boc glycinate 119
- chiral *N*-phosphorylimine 50, 51
- chiral pyrrolidines 41, 556, 562, 566
- chiral silver phosphates
 alkynylation 675
 asymmetric hetero-Diels-Alder
 reaction 685–686
 cycloisomerization 678–683
 α -diazoacetamides 687
 enantioselective semipinacol
 rearrangement 683–685
 hydrogen-bonding interactions 675
 intramolecular annulation 677–678
 Lewis acid activations 674
 Mannich reaction 675–677
 meso-aziridinium and episulfonium
 cations 686
- Chloramine-T 75, 76
- chlorinated arenes 374
- chlorinated 3-pyrrolines 120
- 1-chloroalkynes 375
- chlorobenzene-phenylacetylene
 coupling 767
- [1-chloromethyl-4-fluoro-1,4-diazonia-
 bicyclo[2.2.2]octane
 bis(tetrafluoroborate),
 F-TEDA-BF₄] reagent 372
- chlorosilanes 397, 398, 778
- C–H oxidation 687, 772–776
- C–H trifluoromethylation 192, 306,
 337, 338
- cinchona alkaloid-derived squaramide
 49, 569, 590
- cinchona-derived phosphine ligand
 47
- cinchona-derived primary amine 89,
 575
- cinnamic acids 199, 200, 212, 340, 344
- cis*-disubstituted
 3,6-dihydro-1,2-oxazine
 derivatives 61, 626
- C–N bond formation
 Ag catalysis 382
 aliphatic carboxylic acids 386
 alkyl C–H bonds 380
 amination reaction 384
 aromatic C–H bonds 382
 1,2-dihydro-2,2,4-trimethylquinoline
 derivatives 385
 disilver core 379
 ethynyl carbinols 386
 formamides 384
 homoallylic carbamates 379
 inter-molecular Ag-catalyzed
 amination 381
 ligand-controlled and site-selective
 silver-promoted C–H amination
 383
 nitration of olefins 385
 (-)-*N*-methylwelwitindolinone C
 isothiocyanate 379
 organic azides 386
 parent amines 384
 primary Csp³–H bonds 381
 silver-catalyzed intermolecular
 amination 379

- silver(I)-catalyzed oxidative cyclization 378
- Tp^{*,Br}Ag 380
- C–O bond formation 144–173, 392, 518
- cocatalysts 331
- coinage metals 435, 447, 533, 691, 741
- CO₂-mediated transformation of propargyl alcohols 422
- commonly used silver(I) catalysts 272
- concomitant protodecarboxylation 207
- Conia-ene reaction 86–89, 579
- conjugated ynones 432
- copper acetylide 408
- copper-mediated perfluoroalkylations 301–309
- coumarin-3-acids 204, 205
- coumarins 147, 193, 210, 215, 245, 318
- C–P bond formation 387–392
- cross-coupling of arenes with alcohols 208
- C–S bond formation 392–397
- Csp²-H bond functionalization 338
- Csp³-H trifluoromethylthiolation 393
- 1,4- and 1,5-cyano group migration 255
- 4-cyanopyridine 188
- 2-cyanopyrrolidines 41
- cyclic carbonates 12, 414, 417, 418, 425
- cyclic 1,2-diazine 69
- cyclic 1,3-diketones 88, 581, 633
- cyclic five-membered carbonate 415
- cyclic trifluoromethyl ketimines 50
- cyclizations 759
 - domino and tandem reactions 583
- [2+1] cycloaddition 74–77, 669
- [2+2] cycloaddition 59–60, 78
- [2+2+1] cycloaddition 73–74, 78, 669
- cycloaddition reactions 33–79
- [3+2] cycloadditions
 - azides 53–59
 - azomethine ylides 34–46
- [3+3] cycloadditions 60–63
- [4+1] cycloadditions 77
- [4+2] cycloaddition 63–73, 77, 78, 164, 680, 682
 - Diels–Alder reaction 63
 - hexadehydro Diels–Alder reactions 72–73
 - oxa- and aza-Diels–Alder reactions 67–72
- cycloalkanols 255–258
- cyclobutanol 256, 296
- 1,3-cyclohexadiene 14
- cyclohexadienones 680
- cycloisomerization 678
 - alkynes as partners 159–169
 - 2-alkynylbenzyl azide system 143
 - allenes as partners 168
 - aromatic *N*-heterocyclic compounds 141–143
 - enynes 90–94
 - hydrazones 134–141
 - imines as nucleophiles 123–129
 - 1,*n*-allenynes 94–95
 - 1,*n*-diyne Compounds 95–96
 - oximes 129–134
 - propargyl compounds 96–98
- cyclopenta[*b*]chromenes 240
- cyclopenta[*b*]indoles 104
- cyclopentanols 256, 258, 297, 321
- cyclopentenone 44, 424
- cyclopropanation 75
 - Ag-carbenoid enone cyclopropanation 444
 - alkene cyclopropanation 442
 - diazoacetate effects 443
 - diazoacetates 441
 - enantioselective cyclopropanation 441
 - mechanochemical conditions 441
- cyclopropanols 256, 296, 339
- cyclopropanation
 - donor/acceptor-substituted diazo esters 441
 - N*-nosylhydrazones 443
- cyclopropyl carbinol rearrangement 173
- cytochrome P450 monooxygenases 271

d

- Danishefsky's diene 67, 69, 70, 534, 592, 633
- decarboxylative alkenylation 199
- decarboxylative alkynylation 19–20, 197–199, 340, 341
- decarboxylative azidation 215, 386
- decarboxylative bromination 218, 709
- decarboxylative C–H arylation 354
- decarboxylative chlorination 216, 217, 258, 376, 377, 709, 710
- decarboxylative C–S cross-coupling 395–396
- decarboxylative direct C2-alkylation 342
- decarboxylative etherification 206
- decarboxylative fluorination 22, 23, 218–220, 226, 228, 258, 289, 294–296, 373, 374, 472
- decarboxylative nitration 215
- 3,4-dehydroproline amide derivatives 118
- δ^1 -or δ^2 -pyrrolines 48
- δ^1 -pyrrolines 46
- δ^3 -pyrrolines 119
- Deoxo-Fluor[®] 274
- desilylation reaction 435
- deuterium labeling experiments 458, 463
- diaryl diselenides 202, 397
- 2,5-diaryl-3-hydroxypent-4-ynoic acids 156, 157
- diaryliodonium bromides 370, 371 [4,5-diaryl-2-(2-(prop-2-yn-1-yloxy) aryl)-1*H*-imidazoles] 116
- diaryl selenides 395
- diastereo- and enantioselective Ag-catalyzed azo-Diels–Alder reaction 71
- diastereomeric epoxides 518
- 1,2-diazine 69
- diazines 274, 275, 372
- diazamide 366, 450
- diazo compounds 13–14, 58, 59, 74, 127
involved reactions 364–367
- 2-diazo-3,5-dioxo-6-ynoates 160
- diazonium salts 288, 306, 310, 312, 367
- 6,6-dibenzannulated spiroketals 682
- dibenzocycloheptadienes 253
- 1,3-dicarbonyl compounds 234, 239, 345, 352, 546
- 1,2-dichloroethane (DCE) 160, 202, 218, 305, 729
- Diels–Alder cycloadducts 516
- Diels–Alder reaction 63–69, 72–73, 277, 516
- 1,3-diene 63, 65, 67, 68, 163, 508, 516, 522
- dienoates 513
- difluoroamidation 234
- difluoromethylated arenes 221, 306, 374
- dihydrobenzofurans 155, 241, 288, 333, 760
- dihydrofuran 74, 121, 122, 149, 162, 165, 581, 583, 622
- 2,5-dihydrofurans 149, 151, 620, 669, 677
- dihydrofuroquinolinones 240
- dihydroisobenzofuran derivatives 431
- 1,2-dihydroisoquinolines 123, 124, 139, 583, 670, 679
- dihydronaphthofuran products 162, 163
- dihydropyridines 60, 92
- 1,2-dihydropyridines 92
- 3,6-dihydro-2(1*H*)-pyridones 121
- dihydropyrrole 108, 121
- 2,3-dihydropyrroles 48, 568
- dihydroquinolinones 352
- 3,4-dihydroquinolin-2(1*H*)-ones 352
- 1,2-dihydro-2,2,4-trimethylquinoline derivatives 384, 385
- 1,4-diketones 335
- 4,6-dimethoxy-2,5-quinodihydrochalcone 340
- 4-dimethylaminopyridine (DMAP) 415, 665, 780
- 1-(2,2-dimethylcyclopropyl)methyl ketones 100
- 2,2-dimethylcyclopropylmethyl ketones 360

- dimethylethylenediamine 302
 dimethylsulfoxide (DMSO) 17, 185,
 216, 238, 243, 255, 315, 319, 321,
 410, 749
 2-diphenylphosphino-*N,N*-diisopropyl-
 carboxamide 54
 (diphenylphosphoryl)silver 391
 1,3-dipolar cycloaddition 39–45, 54,
 85, 554, 555, 557–565, 567, 569,
 571, 573, 664, 669, 670, 685
 disilver core 379
 4,6-disubstituted 2-aminopyrimidines
 221, 222
 2,3-disubstituted-1,2-dihydro-
 isoquinolin-1-ylphosphonates
 126
 3,4-disubstituted
 dihydroquinolin-2(1*H*)-ones
 235, 245, 352
 1,4-disubstituted
 1,2-dihydroisoquinolines 124
 1,3-disubstituted furo[3,4-*b*]indoles
 104
 2,4-disubstituted γ -carbolines 130, 132
 1,4-disubstituted imidazoles 48
 1,3-disubstituted isoquinolines 130,
 131
 2,3-disubstituted pyrroles 362
 2,5-disubstituted pyrrolines 108
 2,5-disubstituted 3-pyrrolines
 119, 120
 1,4-disubstituted-1,2,3-triazoles
 55, 58
 1,4-disubstituted 1,2,3-triazole 57
 2,6-di-*tert*-butyl-4-methylphenol (BHT)
 741
 1,6-diyne compound 411, 413
 1,6-diyne-4-en-3-ol 95, 96
 1,3-diyne 310, 332, 612, 675
 1,6-diyne 95
 domino and tandem reactions
 Aldol reaction 579–583
 aliphatic aldehydes,
 o-thiomethyl-*p*-anisidine, and
 Danishefsky's diene 592
 alkyl 2-formylbenzoates and
 allyltrimethoxysilane 593, 594
 alkyne-tethered cyclobutanols 593
 cyclization 583–589
 Mannich reaction 589–592
 Michael addition 574–579
 ortho-alkynylaryl aldimines and
 indoles 585
 domino hydroamination/semipinacol
 rearrangement reaction 593
 domino Michael/cyclization reaction
 568, 570, 574, 633
 donor–acceptor cyclopropenes 62,
 626
 double-decarboxylative cross-coupling
 340, 344
- e**
- (*E*)- β -B(dam)acrylates 43
 electrocyclic reactions 99–100
 electron-deficient pyridines 358
 electrophilic silver-catalyzed
 fluorination 279–287
 electrospinning deposition 730
 elemental silver 1
 enamides 202, 394, 395
 enantioenriched α -aminoallenes 118
 enantiomerically enriched
 dihydropyranones 146, 147
 enantiomeric silver-catalyzed
 carbostannylation of alkynes 92
 enantioselective Mannich cyclization
 51
 enantioselective *N*- and *O*-nitroso-aldol
 synthesis 13
 enantioselective nitroso aldol reaction
 12–13
 5-*endo*-dig cyclization 108–110, 112,
 145, 348, 570, 592, 613
 6-*endo* pyrones 156
 enolate intermediates 431, 432
 enolate-sequential cyclization
 431–435
 4-en-1-one intermediate 360
 enones 35, 59, 60, 423, 424, 441, 444,
 680, 729
 2-en-4-yn-1-azides 144
 enynes 90–94, 612, 675

- 1,4-enynes 423
 1,6-enynes 90, 243, 246, 318
 epoxide-propargylic esters 153, 154
 epoxides reduction
 Ag NPs/HT-catalyzed epoxide
 deoxygenation 756
 hydrotalcite (HT) 756, 757
 hydrotalcite-supported Ag 757
 isopropanol 756
 nitro compound reduction 757–759
 3,4-epoxybut-1-ene production (EpB)
 733
 ester 13, 40, 43, 95, 195, 276, 344, 408,
 441, 458, 534, 669, 676, 679, 680,
 691, 706
 ethoxycarbonyldifluoromethylation
 191, 192, 307, 367, 368
 ethylene oxide (EO) 4, 724
 2-ethynylanilines 688
 ethynyl carbinols 17, 386
 evelynin 256, 340
 (E)-vinyl sulfones 363
exo-alkenyl cyclic carbonates
 12, 418
exo-cyclic alkenes 419
 5-*exo*-dig cyclization 12, 92, 93, 102,
 103, 105, 129, 144, 147, 163, 165,
 418, 431, 432, 435, 575, 670, 671,
 708, 759
 5-*exo* tetronic acids 156
exo-trig cyclizations 116–118
 5-*exo*-trig vinyl-substituted
 tetrahydrofurans 152
- f**
 Feringa's phosphoramidites 39
 ferrocene-based ligand Taniaphos 41
 ferrocenyloxazoline-based *N,P*-ligand
 40
 5-and 6-endo-trig cyclizations
 118–122
 5-membered cyclic carbonates 422,
 423
 5-substituted 1*H*-tetrazole 56
 fluorinated imines 45, 46
 fluorinated isoquinolines 123, 286
 fluorinated oxazolidin-2-ones
 250, 293
 fluorinated product 279, 413, 544
 fluorination reactions 22–23, 219,
 272–274, 279, 280, 372, 374, 413
 fluoroalkylation of thiols 205
 fluoroarylation of styrenes 226, 227,
 288, 289
 4-fluoro-2,5-dihydropyrroles 22, 120
 5-(fluoromethyl)-4,5-dihydroisoxazoles
 229, 292, 293
 5-fluoromethyl-substituted γ -lactams
 291
 fluticasone propionate 219, 374
 formamides 194, 383, 384, 423
 4,6-substituted
 pyrrolo[3,2-*d*]pyrimidines 110,
 111
 4-substituted benzofurans 165
 5-substituted tetrazoles 55
 fulvenes 33, 60, 61, 240
 functionalized propiolic acids 369
 functionalized quinolin-2(1*H*)-ones
 236
 functionalized silver nanoparticles
 (FnAgNPs) cycloaddition 57
 2-furanones 435
 furanopyrimidine nucleosides 159
 furans 90, 92, 145, 168, 196, 239, 241,
 335, 336, 350–352, 387, 679
 furoquinoline 159, 160
 fused bicyclic pyrrolidine 36, 559
- g**
 γ -allenoic acids 153, 158
 γ -allenols 153, 154
gem-difluoroalkenes 201, 308, 367, 369
gem-difluoromethylenated
 phenanthridine 348
 Glaser coupling 332
 glycyll sultam 43, 44
 Grignard reagents 14–15, 201, 397,
 398, 407, 491, 665, 674
 guanidine 103, 104, 122

- silver-catalyzed decarboxylative arylation 361, 362
- silver-catalyzed decarboxylative chlorination 376, 377
- silver-catalyzed 1,3-dipolar cycloaddition
 - glycine imino esters and α,β -unsaturated carbonyl compounds
 - chiral mono- and biphosphine ligands 555
 - glycine imino esters and nitroalkenes
 - α -substituted imino esters 564
 - α -imino γ -lactones 566, 567
 - MonoPhos and Phosferrox ligands 567
 - phosphoramidite ligand 564, 565
 - ThioClickFerrophos ligand 566
 - Xing-Phos ligand 565
- isocyanoacetates and α,β -unsaturated carbonyl compounds 568–572
- isoquinolinium/phthalazinium methylides and enecarbamates 573
- silver-catalyzed 1,3-dipolar cycloadditions
 - α -imino ester 554
 - azomethine ylides 554, 555
 - glycine imino esters and α,β -unsaturated carbonyl compounds
 - AgOAc and
 - (*S*)-TF-BiphamPhos-derived ligand 560
 - α -silylimines and pyrone-based trisubstituted olefins 563
 - azomethine ylides 558
 - chalcones 556, 557
 - cyclopentene-1,3-diones 558
 - diethyl maleate 563, 564
 - 2,2-dimethoxyacetaldehyde-derived glycine imino esters 563
 - electron-deficient and electron-neutral substituents 557
 - ethyl glyoxylate, phenylalanine ethyl ester, and maleimides 560
 - 2*H*-pyrroles and polysubstituted pyrrole derivatives 561
 - L-tert*-leucine amidophosphate 563
 - (*S*)-TF-BiphamPhos-type ligand 559
 - Xing-Phos ligand 561, 562
- silver-catalyzed double Csp^3-H cross-coupling 335
- silver catalyzed fluorinated quinoline synthesis 334
- silver-catalyzed intermolecular amination 379, 500
- silver-catalyzed intermolecular fluoroarylation 288
- silver-catalyzed intramolecular carbocyclization 360
- silver-catalyzed intramolecular fluoroarylation 289
- silver-catalyzed Mannich reactions
 - alkenyl trichloroacetates 552, 553
 - α,α -dicyanoolefins 549, 550
 - α,β -diamino methyl esters 547
 - α -sulfanyl lactones 550, 552
 - β -dicarbonyl compounds 547
 - chiral α,α -disubstituted α -amino acid derivatives 552
 - chiral quaternary α,β -diamino acid derivatives 550
 - ferrocenyl chiral ligand 548
 - glycine Schiff base 547, 548
 - imino glycine alkyl esters 547
 - isatin-based ketimines 553, 554
 - N*-aryl aromatic aldimines and alkenyl trichloroacetates 553
 - N*-tosyl aldimines 550, 551
 - N*-tosyl aldimines and oxazolones 551
 - N*-tosyl aryl aldimines 548, 549
 - Vinylogous Mukaiyama–Mannich reactions, Hoveyda–Snapper catalysts 534–546
- silver-catalyzed nitrene transfer reaction 21

- silver(I)-catalyzed oxidative cyclization 378
- silver-catalyzed oxidative dearomatization/cycloisomerization/Michael addition cascade 165
- silver-catalyzed oxidative
 - homodimerization of free indoles 360
- silver-catalyzed oxyfluorination 293
- silver-catalyzed perfluoroalkylations 313–314
- silver-catalyzed phosphonofluorination 291
- silver-catalyzed phosphorus carbocyclization 351
- silver(II)-catalyzed
 - protodecarboxylation 186
- silver-catalyzed radical aminofluorination 292
- silver-catalyzed radical carbofluorination 289, 290
- silver-catalyzed tandem trifluoromethylation 348
- silver-catalyzed three-component coupling 332
- silver-catalyzed transmetalation 397, 398
- silver-chelated aldehyde 67
- silver-complexed ferrocenyl *N,P*-ligands 40
- silver complexes, in organic reactions
 - arylated fluoroalkyl halides 711, 712
 - chiral silver phosphates 674–688
 - A³ coupling reactions 711, 713
 - NHC silver complex 662–674
 - P,O-type silver complexes 688–689
 - pyridine-containing ligands
 - aziridination vs. C–H amination 698–706
 - carbene insertion 706–707
 - Hunsdiecker reaction 709–710
